

Project Scope: Study Room Booking System

1 Study Room Booking Software

1.1 Room Management

- 1.1.1 View available study rooms based on capacity and equipment.
- 1.1.2 Add, edit, or delete study rooms from the system (Admin only).
- 1.1.3 Search for specific rooms by text search (ex. room number or building).
- 1.1.4 Categorize rooms by type (ex. quiet zone, collaboration space, presentation room).

1.2 Booking Management

- 1.2.1 Add a room reservation with a specific starting and ending time.
- 1.2.2 Check time conflicts and enforce availability when adding events.
- 1.2.3 Modify & delete existing reservations.
- 1.2.4 View a daily schedule showing all booked and available time slots for a specific room.

1.3 User Accounts & Authentication

- 1.3.1 Register and authenticate student and administrator profiles.
- 1.3.2 View a personalized list of a user's upcoming and past room reservations.
- 1.3.3 Restrict booking privileges based on university daily time limits.

1.4 Other

- 1.4.1 Zoom in/out, and scroll support when necessary on the user interface.
- 1.4.2 Color specific marking to indicate if a room is currently "Available" or "Occupied."
